

IRONSMITH

ARCHITECTURAL PRODUCTS

For half round half square tree grates please refer to the PDF and CAD files for the individual square and round components.

Round grates end in odd numbers, square grates end in even. The first numbers are the size.

As an example: 3614/15-1 Half square half round.

Look up: 3614-1 for square and 3615-1 for round section.
